

DATA SCIENCE / ML & AI

Jihene Troudi

Portfolio — seeking a final-year internship

I turn complex signals into useful systems.

Data Science engineering student at ESPRIT and exchange student at CY Tech. I build generative AI solutions that bring data, products and real-world teams closer together.

OPEN CHANNEL

Available for a final-year internship in Data Science, Machine Learning or generative AI.

An engineer who likes to understand before automating.

My playground is where technology has to do more than work. It must explain, support decisions and fit into the everyday lives of teams. I have built RAG assistants, LangChain agents orchestrating tools, on-device models and complete data applications.

02 / SELECTED SYSTEMS

01

AgriSmart

Precision agriculture platform

A trilingual mobile platform combining an AI agent, satellite data, on-device vision and IoT to make agricultural decisions more autonomous.

LangChain · GPT-4o-mini · RandomForest · TensorFlow Lite · Flutter · FastAPI

↳ 98.6% accuracy · selected for ESPRIT Projects Ball 2026

02

Ooredoo Voice

AI telecom assistant for domain engineers

A RAG assistant connected to a 3GPP knowledge base and able to analyze technical traces to accelerate network troubleshooting.

Flask · React · Ollama · RAG · Python

↳ Semantic RAG · pcap trace analysis · root-cause cards

03

Reinforcement Learning Trees

Machine learning methodology research

A from-scratch implementation of RLT trees and forests, benchmarked on ten UCI datasets against several reference methods.

Python · scikit-learn · CRISP-DM

↳ Node · RLTree · RLForest · classification & régression

In the field, not only in notebooks.

06—08 / 2026

Ooredoo Tunisie

Data Science Intern

Developed a telecom troubleshooting assistant based on RAG + a local LLM for 5G/3GPP signaling analysis. Analyzed pcap network traces and built a Flask backend, React frontend and vectorized knowledge base.

07—08 / 2025

Banque de Tunisie

Enterprise Monitoring Intern

Deployed and configured Zabbix to monitor critical banking systems, with real-time dashboards and time-series data storage through MySQL.

06—07 / 2023

CPG — Gafsa

HR & Data Intern

Collected and analyzed employee satisfaction metrics, designed a structured database and prepared internal reporting.

04 / TOOLKIT

Agents & LLM	LangChain · ReAct · Tool Calling · Ollama · RAG · OpenAI API
AI / ML	scikit-learn · RandomForest · CNN · LSTM · BERT · CLIP · NLP
Development	FastAPI · Flask · React · Symfony · Spring · Flutter · REST
Data & systems	Python · Java · C++ · SQL · Power BI · Docker · Linux · Git

Build, learn, share.

Computer Engineering — Data Science

ESPRIT · Tunis · Sept. 2021 — Present

International exchange semester

CY Tech · Cergy, France · Sept. — Déc. 2026

Certifications & distinctions

Applications of AI for Anomaly Detection — NVIDIA, April 2026

Fundamentals of Deep Learning — NVIDIA, January 2026

Top 10 — Hackathon ESPRIT 2026

LANGUAGES

Arabic (native) · French (B2) · English (B2) · Korean (B1) · Spanish (intermediate)

An ambitious topic? **Let's build what's next.**

I am looking for a final-year internship where I can contribute to useful data and AI systems while continuing to learn alongside a demanding team.
